

I'm enjoying retirement. I actively bicycle with the Evanston Bicycle Club, and have ridden cross-country and in over 40 states. My wife and I travel extensively (snowbirds in San Diego; visited Morocco, Spain and Portugal last fall).

We frequently are with our two (adult) children and grandson, all of whom live in the Chicago area. (Peggy Steele may remember watching our very young daughter one afternoon, so I could fly to Northeast Missouri State University and pick up a signed contract and check at the end of the NOTIS fiscal year.)

Still married to Karen (54 years now).

I worked for the Northwestern University Library for 8 years before joining NOTIS. When the library decided to market NOTIS, I was hired to upgrade the punch card-based circulation module. (Remember punch cards?) Later I transferred to the nascent NOTIS group. The opportunity to grow NOTIS' capabilities and work with staff and customers was a highlight of my career. After NOTIS I enjoyed IT consulting in North America, Europe and Asia. At various times was a project manager, DBA, analyst and developer. The final 10 years were very rewarding, working as an architect for very large database systems.

I will miss the NOTIS reunion due to family business out of town. My greetings to everyone; have a great time!

Bruce Miller
