

## **Linda Zaleski -- NOTIS Reunion Bio**

It was great to work for NOTIS 1991-2001. It was my second job for a vendor after working for Geac in Canada and Europe for ten years. So many of the Geac customers had migrated to NOTIS. My first job at NOTIS was working in Sales Support doing demos and helping with RFPS. I travelled with Jane and the sales team on many many demos and ALA's. Eventually I also worked on NOTIS Horizon and then we all know what happened next...

The Ameritech/Dynix/Epixtech years came along. I was in product management for Horizon and finally departed to work on Polaris for Gaylord. Since then I spent 9 years as the Systems Manager for the CCS public library consortium in Chicago and eventually moved to ExLibris to head up support for Endeavor and NA Aleph.

At the end of 2022 I retired from Ex Libris, and have become involved assisting small non-profits with digitization efforts. I skated seriously until two years ago and have been playing the Carillon at the Chicago Botanic Gardens for about ten years. My husband Paul and I divide our time between Fennville, Michigan and Illinois.
